Juan Mauricio Robledo

Dear Hiring Manager

I am writing in response to the job posting advertisement.

I graduated from the university in the year 2017 as a lawyer. Although I practiced in the legal profession for almost 5 years, the computer science field has been my passion since I was a child.

Regardless of the work area in which one develops, the advancement of the new technological sciences is present and essential for the development of our future.

This led me to enter the fields of data analytics and programming, not only because of what I previously mentioned, but also because I aim to expand my knowledge and skills beyond the limits of my country's borders.

I have knowledge of Data cleaning | Data visualization | Spreadsheets | SQL | Tableau | R HTML/HTML5 CSS/CSS3 Bootstrap 5 DOM Manipulation Javascript HTTP/JSON/AJAX React Git + Github Node.js Express.js NPM

Currently, I continue to perfect myself in this area, hoping to provide a professional service that is up to the objectives required by your company. Not only do I meet the requirements for the position, but I have additional skills due to my degree practice, such as resilience, conflict resolution, negotiator, oral and written communication, and discretion, among others.

I'm looking forward to being part of the work team and being able to grow as a professional.

Kind regards
